

SMD-Jetter INOPLACER COMPACT IP-CD

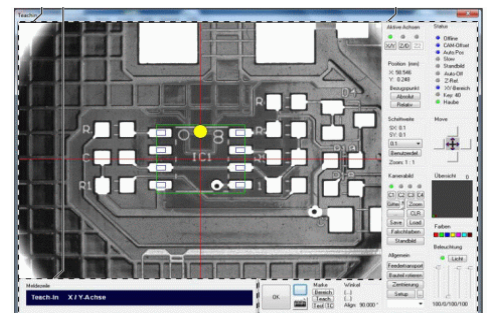

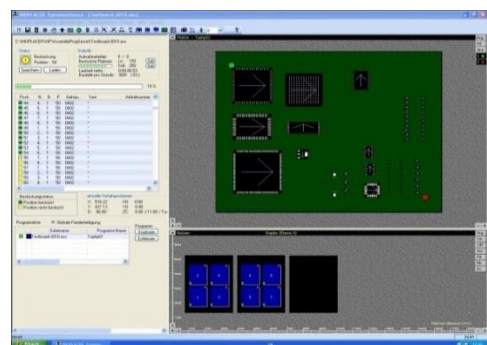

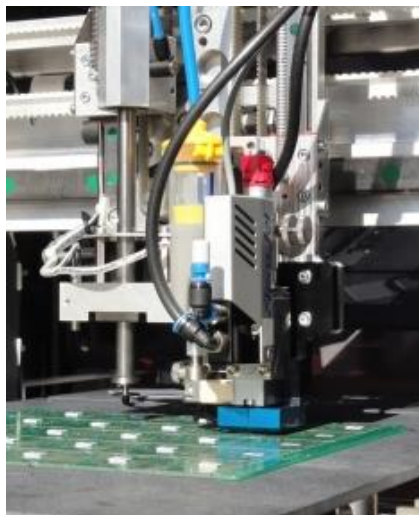

with *AeroJet*[®]

- working area 320 x 550 mm
- *AeroJet* for solder paste and SMT glue
- dispensing speed 9000 dots/h.
- programming directly by CAD data
- fiducial alignment by vision system
- option: inline

SMD-Jetter INOPLACER COMPACT IP-CD

The INOPLACER COMPACT BD is a compact dispensing machine for SMD lines. In this case, the jet valve is suitable for the dispensing of SMT adhesives and solder paste and is more flexible than the conventional stencil printing.

Technical Data

working area	400 x 400 mm	dimensions HxWxD	1500x1030x1000 mm
Software	INOSOFT INOVISION	necessary area	1100 x 1500 mm
AeroJet		conditions	20-25°C, 48-60 % humidity
for solder paste and SMT glue		weight	ca. 300 kg
max. dispensing frequency	330 dots/s	color	grey RAL 7035
min dot size	0,5mm		
SuperSIGMA			
for solder paste and SMT glue		Solid machine and vision system guarantee very precise and reproducible placement results.	
max. dispensing frequency (incl. z stroke)	2 dots/s	INOPLACER COMPACT BD	
min dor size	0,2mm	It is suitable for small and medium batch sizes.	
electr. power supply	230 V/50 Hz	Reserve technical changes, Images show options and accessories	
air supply	6 bar, dry oil free, ca. 50 l/min
